

PATENTS

Overview

Navigating the patent process can be complex, but our team handles all aspects of filing, prosecution, with patent offices seamlessly. Kochhar & Co. helps organizations and inventors protect and maximize the value of their inventions through comprehensive patent services. The Firm supports inventors, startups, and established businesses at every stage of the patent process.

The Firm performs detailed prior art searches and patentability assessments. This step helps inventors and applicants understand the existing landscape, evaluate the uniqueness of their invention, and make informed decisions about pursuing patent protection. The Firm combines technical expertise and legal insight to ensure every assessment is thorough and reliable.

Once an invention's potential is confirmed, we focus on drafting robust patent applications. The Firm works closely with clients to ensure each application is technically precise and strategically crafted for strong protection.

Our team is highly experienced in filing and prosecuting PCT National Phase applications in India. We regularly collaborate with leading law firms across various jurisdictions for both Indian and foreign PCT national phase filings.

The Firm provides and assists the clients with ongoing portfolio management to keep the patents active and the portfolio up to date. The Firm also offers legal advice for commercialization, assessing infringement risks, and drafting agreements that unlock the full value of the client's intellectual property.

The Firm uses a state-of-the-art docketing system to meticulously track deadlines to manage clients' IP portfolios efficiently. Our advanced systems, utilizing a combination of automated tracking and manual supervision, ensures that all critical dates are monitored and that the client's IP assets remain secure and up to date.
